## Acknowledgments

I would not have written this book unless Professor Frederic G. Reamer, the editor of the Foundations of Social Work Knowledge Series, had offered me an opportunity to sum up my insights into injustice, oppression, and social change. I am grateful to him for urging me to accept this assignment, for it enabled me to develop and present my thoughts more systematically than I had done in separate publications in the past.

I would also like to thank my editors at Columbia University Press, John Michel, Alexander Thorp, Jennifer Perillo, Stephen Wesley, and Michel Haskell, as well as the reviewers of my manuscript, for their support throughout the writing of this book. Finally, my thanks go to the editorial, design, desk-topping, and marketing staffs of Columbia University Press; to Auralie Logan, who made the original index; and Robert Swanson, who prepared the index of the revised edition.
