ACKNOWLEDGMENTS

The initial idea for this book came at the Advanced Graduate Workshop on Poverty, Development and Globalization cosponsored by The Brooks World Poverty Institute at the University of Manchester and The Initiative for Policy Dialogue at Columbia University. There, Joseph Stiglitz gave us his views on the relationship between migration and development and on the challenges and opportunities that international migration presents for the world's developmental prospects. The introduction to this volume reflects this conversation.

Drafts of the chapters in this volume were presented at two conferences: one held at Columbia University in April 2008 and the other held at the Universidad Nacional Autónoma de México (UNAM) in January 2009. We benefited from the comments provided by all the participants who generously gave of their time and expertise. These include Dante Ang, former chairman of the Commission on Filipinos Overseas; Graziano Battistella, director of the Scalabrini Migration Center; Professor Alejandro Canales Ceron at the Centro Universitario de Ciencias Economico Administrativas Universidad de Guadalajara; Benjamin Davis, director of the AFL-CIO Solidarity Center; Christian Dustmann, professor of economics at University College London; Luis Jorge Garay, associate research fellow at the Comparative Regional Integration Studies Programme of the United Nations University; Victoria Garchitorena, president of the Ayala Foundation; Stephany Griffith-Jones, financial markets director at The Initiative for Policy Dialogue at Columbia University; Susan Gzesh, executive director of the Human Rights Program at the University of Chicago; Talip Kilic from the Development Research Group of the World Bank; Jeni Klugman, director of gender and development at the World Bank and former director of the Human Development Report Office of the United
