abrogation of authority by supervisors, 69–72
absenteeism, 41–42
abuse, as source of stress, 173
acceptance, atmosphere of, 130–131
accountability: versus autonomy, 341–342; balancing autonomy and, 329–330
achievement: promoting in supportive supervision, 190; as source of job satisfaction, 129
active involvement, in learning, 134–135
actively engaging learner in assessment, 140
adaptations, supervisee, as source of support, 196
administration: administrative buffer, supervisor as, 49–51; advocate role of supervisor, 48–49; change agent, supervisor as, 51–52; conflicts between profession and bureaucracy, 340–342; influence on task delegation, 40; interminable supervision and debureaucratization, 330–333; practices enhancing supervisory authority, 68; role of, 10; sexism and, 343–344; supervisor evaluation by, 269; working with, problems related to, 236–238. See also supervisory authority and power
administrative buffer, supervisor as, 49–51
administrative objectives of evaluation, 250
administrative supervision: administrative buffer, supervisor as, 49–51; advocate role of supervisor, 48–49; change agent, supervisor as, 51–53; communication function, 43–48; continued, 326; coordinating work, 42–43; definitions of, 8–9, 11–14; educational supervision and, 93–96; and evaluation, 270–271; explaining supervision, 32–33; good supervisor characteristics, 243; inducting and placing workers, 30–32; in managed care context, 335–336; monitoring, reviewing, and evaluating work, 40–42; organizational bureaucracy, 27–28; overview, 160; as source of stress, 167; staff recruitment and selection, 28–30; and supportive supervision, 161; value of evaluation to, 249; work assignment, 34–37; work delegation, 37–40; work planning, 33–34
—problems in implementation: disciplinary action, 87–89; noncompliance, 81–87; rules, functional value of, 78–81; vicarious liability, 54–57. See also supervisory authority and power
administrator, good supervisor as, 243. See also administration
adult learning. See learning
advancement, as source of job satisfaction, 129
advocate role of supervisor, 48–49
Affordable Care Act of 2010, 338–339
African American supervisees, 222–223
challenges of practice, balancing learning between skills and, 133
change: effect of anxiety regarding on learning, 131; planned, in educational supervision, 99; in social work profession, effect on supervisor, 219; as source of stress, 167–168
change agent, supervisor as, 51–53
Charity Organization Society movement: education in, 5–7; supervision in, 1–5
child welfare services, 86
circumstantial, in group supervision, 283
circular nature of feelings leading to burnout, 166
Civil Rights Act of 1964, 234
clarity, maximizing energy for learning through, 130
client focus, SWAI, 269
clients: assault on, 186–187; as captives of agency, 23; changes in attitude toward when becoming supervisor, 213; educational supervision outcomes, 93; feedback and outcomes in live supervision, 317–320; feedback from, using supervision to elicit, 115; as information source for evaluation, 266, 267; and noncompliance, understanding, 82, 83–84; parallel process component in educational supervision, 151–155; protection of through rules, 80; sexual harassment by, 235–236; sharing of experience with in group supervision, 276–277; as source of stress, 170–173; as source of supervisory authority, 59; as source of support for supervisees, 194–195; supervisee games redefining worker as, 197; supervisor as administrative buffer, 49–50; supervisor focus on, effect on learning, 143; value of evaluation to, 250
clinical approach, use in teaching, 108
clinical case material, in group supervision, 285–286
clinical-educational supervision. See educational supervision
clinical practice, as preparation for becoming supervisor, 209–210
clinical supervision, 90
closure, lack of in social work, 172
code of ethics, NASW, 17, 32, 246
codes of conduct, state, 32
coercive power: general discussion, 60–61; interrelationships among types of power, 62–66
coercive power: general discussion, 60–61; interrelationships among types of power, 62–66
cognitive reframing, 241
cohesion, in group supervision, 278, 281
cooperation, with peers, 330
Columbia University School of Social Work, 7
commitment: as factor in burnout, 182; involved in effective evaluation, 255; supportive supervision focus on, 161
communication: of evaluation, 263–265; in group supervision, 281
communication function, in administrative supervision: informal communication, 48; lateral communication, 47–48; overview, 43–44; problems in, 46–47; process in, 44–46
community: accountability to, 21; attitudes toward social work, as source of stress, 178–179; authority as deriving from, 58–59; influence on supervision, 14–16
community liaison, supervisor as, 53
community workers, observation of, 300–301
competence: association with stress and burnout, 180–181; confirmation of, lack of as source of stress, 175–176; contributing to as part of supportive supervision, 182–183; influence of group supervision on assessment of, 277; maximizing energy for learning through, 132; of supervisor, effect on learning, 142
competent caring, 180
competition, in group supervision, 280
complaints, supervisor as administrative buffer from, 49–50
compliance, rigid, 75–76
compliments: in supportive supervision, 190–191; tempering criticism with, 113
conceptual teaching, 109–110
concrete-active learning orientation, 137
conferences: evaluation, 260–263; state and national, 6. See also evaluation; group supervision; individual supervisory conference
confidence: maximizing energy for learning through, 132; role in communication, 47
confidentiality: in group supervision, 282; in managed care context, 337
confirmation of competence, lack of as source of stress, 175–176
conflicting role obligations, in supportive supervision, 189
conflict resolution, 43
conformity, in group supervision, 281
confrontation, countering supervisee games with, 202–203
conscious learning, 136–137
consent, informed, 59, 307–308, 315
consent of supervisees, as forming countervailing power, 75
consideration, as aspect of supervision, 159–160, 224–225
consideration scale, Leadership Opinion Questionnaire, 70–71
consistency, of evaluation, 259
constructive feedback, in individual supervisory conference, 112–116
consultation, peer, 330
counting: element of in burnout, 166; as process related to client feelings, 170–171
context of tasks, as source of stress, 173–176
continued supervision. See interminable supervision
continuity of service, 42
continuous process: evaluation as, 255; evaluation
preparation as, 260
contracts, supervision, 257, 332–333
contradictory demands, as source of stress, 175
control: in group supervision, 281; professional versus
bureaucratic, 340–341; in supervisory authority, 58;
of supervisory situation, supervisee games related to,
200–202. See also supervisory authority and
