- academic and clinical writing on dying:
and anger, 101; and depression, 96;
focus on sadness and loss in, 12; focus
on suffering, 56; limitations of, x–xi,
2, 7, 12; onlooker's perspective as
characteristic perspective of, 7; and
relationships, 119; and suffering,
16–17; and waiting for death by dying
person, 135, 145; and waiting for death
by loved ones, 131
- acceptance of death, 85–87, 90; contro-
versy surrounding, 85; vs. denial, 86;
vs. helplessness, 84; as joint effort with
love ones, 90–91; loved ones' difficulty
of accepting, 85, 86–87, 88–89, 90–91;
and openness to new experience, 208;
prevailing “war on disease” paradigm
and, 84, 85–86; and resistance to pres-
sure to continue fight, 85, 86, 88–91;
Saint-Exupéry on, 178; and social
isolation, 173–74; in suicide, 90
- Adunsky, Abraham, 189
- afterlife: and deathbed visions, reality
of as issue, 201–4; possibility of as
unknown, 167
- aging: dying from, and definition of
dying process as issue, 8–9; as slow
social death, 78
- AIDS patients: acceptance of death
in, 86–87; physical suffering in, 18;
psychological suffering in, 22; social
suffering in, 28–29; stigma attached
to, 28; waiting for death in, 132,
143–45, 146
- Ainu people of Japan, 133
- Alighieri, Dante, 149
- aloneness: as condition of modern
existential malaise, 169–70; hallucina-
tions in, 176–80; negative perception
of, 169–70, 180–81; perception of, as
culturally determined, 180–81; protec-
tive power of devotion to cause or
belief system in, 176
- aloneness in dying: and bodily decay,
people's aversion to, 174; bystander
indifference and, 174; and develop-
ment of new self, 205–6; difficulty
of overcoming, 170; experience of,
difficulty of comprehending, 181; and
fear, experience of, 48; hallucinations
in, 180, 185–86; inability of others to
fully empathize and, 172, 173–74, 175,
181, 182–83; individualism of modern
culture and, 172; Internet commu-
nication with other dying persons as
remedy for, 181–84; modern medical
care and, 172; at moment of death,
fear of, 175, 183; as occasion for
transformative experience, 206–7,
212; perception of as negative experi-
ence, 169; physical isolation and,
181; positive consequences of, 211;

- preference for in some individuals, 184–85; process of social disappearing and, 169, 170–71, 172–75; and retreat to inner resources, 175–76, 180–81, 185–86, 206–7, 214; sources of, 172; writings on, 171
- aloneness in mortal suffering: case studies, 20–22, 23–24; reality check prompted by, 31–32; Saint-Exupéry on, 15–16
- ALS (amyotrophic lateral sclerosis)
patients: anger in, 105–6; hope experienced by, 110–11; inner transformation in, 214–15; physical suffering in, 18, 21; sadness in, 98–99, 110; waiting for death in, 137
- Altman, Leon, 139
- Alvarez, Al, 73–74
- Alzheimer's patients: anger in, 102; fear generated by diagnosis, 37; psychological suffering in, 22, 27; waiting for death in, 132
- Amato, J. A., 16
- Aminoff, Bechor, 189
- anger, 101–7; in animals, 108–9; bursts of, 25; causes of, 101–3; complexity of underlying feelings in, 107–8; frustration as cause of, 101, 102, 103–4; guilt created by, 106–7; hope and love experienced in context of, 110–11; at injustice or offense, 102, 103, 104; as legitimate criticism, 103; literature on, 101; at loss, 101–2, 108–9; at loss of control, 104; at loss of former life and status, 104–5, 105–6, 108; messages sent by, 102; as occasion to reevaluate self and social relationships, 111; positive consequences of, 211, 213; as response to pain, 102, 103; rituals of healing from, 101; and sadness, as linked emotions, 94, 100–101; self-directed, 107; as source of power, 103; thought of lost future and, 93; at treatment by medical staff or caregivers, 104–5; at unfairness of life, 101, 106; variations in expression of, 102; at wait for death, 136
