

CONTENTS

Acknowledgments	vii
Introduction	ix
PART I: Uncertainty	
1 Forecasting in Extreme Environments	3
2 Thinking in Probabilities	32
3 The Balance Between Overconfidence and Underconfidence, and the Special Risk of Complex Modeling	55
PART II: Information	
4 Fighting Information Overload with Strategy	87
5 Making Decisions in Real Time: How to React to New Information Without Falling Victim to Cognitive Dissonance	110
6 Mitigating Information Asymmetry	137
PART III: Analysis and Judgment	
7 Mapping from Simple Ideas to Complex Analysis	157
8 The Power and Pitfalls of Monte Carlo Modeling	178
9 Judgment	206
Notes	237
Index	257
