

Index

- Accenture, 3, 4
- adaptation: bifurcation in firms, 67–68; cluster, 106–8, 116–17; evolution and, 39–44, 65, 66, 102–3, 148–49; of new inos, 65; organization, 66–67. *See also* ecological adaptation
- adaptive change: adaptive economy and, 25, 26; of clusters, 137; ecology and, 25–26; knowledge and, 60; network, 224–25; panarchy and, 30, 32. *See also* evolution
- adaptive complex systems, 68; adaptive economies as, 24, 28; ecology as, 24, 28; feedback loops, 29; growth of, 106; as networked, 28–29; overview, 24; predictability of, 221; selective feedback, 102. *See also* panarchy
- adaptive economy: adaptive change and, 25, 26; as adaptive complex system, 24, 28; bifurcation in, 65–67; capabilities and, 322n4; competition in, 65; cycles, 103; ecological adaptation and, 19–24, 32, 229; evolution and, 20–21, 23–24, 32; life and, 19; overview, 19, 229; selection in, 65; selective feedback in, 65; value and, 19
- adaptive flow, complexity and efficiency, 23–28
- adaptive selection, 103; adaptive selective feedback, 30, 33, 65, 102
- adaptive systems, 32; evolutionary, 221, 222, 227–28, 324n3; growth of, 106. *See also* adaptive complex systems
- agriculture, mono-crop, 278, 332n28
- aircraft, 128–29; taxonomy, 67, 68
- airline industry, 154, 325n9
- allocations: as bets, 86–87, 323n7; capability assessment and, 95–97; cash cow cluster, 159–61; cluster, 141, 153, 209; economy types and allocators, 235–42; firms unique capability mix and, 89–98; inflation and, 282–89, 297; innovation and, 157; lottery cluster, 146; management and, 208–9; moated firms and, 208–9, 295, 295–97; money shocks and, 244–98; $MV=P$ equation and, 290–96, 291; negative optionality and, 84–88; as quest for true knowledge, 318; Red Queen clusters, 153–57; stable cluster, 157–65. *See also* nature of value allocation
- Amazon, 139, 145, 156, 196–97
- amplification: economic predictability and knowledge, 232–33, 328n6; evolutionary, 39–41; selective

- amplification (*continued*)
 feedback and organization, 102; of successful organization capabilities, 103
- Anderson, P. W., 321n10
- animals: energy and, 43, 43–44, 321n7; evolution of, 43, 43–44; survival cycle, 136. *See also* humans
- anthropomorphization, 200–201
- Apple, 3, 4, 59, 62, 124–25, 139, 197, 213; iPhone, 60, 130, 184, 272; moats, 183–84, 196; unique capability footprint, 94–95, 95
- architectures: automobile, 131, 324n3; computer, 131–32; dominant design, 131; enabling, 131
- ascendancy, 322n10
- asset bubbles, 280, 292; deflation and, 270; money creation during, 332n29; U.S. housing asset bubble, 14–15, 257–58, 330n8
- assets: flawed price models and, 4–5; price busts, 292; real asset moats, 296
- automobiles: architecture, 131, 324n3; dominant design, 130–31, 131; evolution, 130, 131, 324n3; manufacturers birth and death, 135, 135
- Ayres, Robert U., 21, 22
- Bagehot, Walter, 20, 283
- Bak, Per, 62, 328n2
- banks. *See* central banks
- beer, 203–4, 267
- behavior: behavioral economic model of price, 7, 11–12; consumer-altering moats and, 194–204; economics and, 256; moats, 194, 194, 197, 199; predictable environment and growth, 229–32
- Bejan, Adrian, 37, 69, 328n2
- belief and perception moats: brand belief moat, 199–204; overview, 194, 196–204
- beliefs: consumer-altering moats and, 194–204; currency and, 246–50, 256, 263, 266, 268, 297; money and, 245, 251, 252–53, 254, 255–56, 330n1; price and, 255–56
- Berkshire Hathaway, 97, 211, 295, 296, 324n6; nature of value allocation, 311–14, 312, 313
- beta, 302, 333nn2–3
- bets: allocations as, 86–87, 323n7; gun-shot bet on few shares, 304–6
- bifurcations: adaptive economy and, 65–67; capability, 128; firms and adaptation, 67–68; flows, 24–25, 25, 68, 322n6; overview, 24, 40–41, 322n6; throughput and, 24, 68–69. *See also* Constructal theory
- biology. *See* ecology
- Black-Scholes equation, 9, 10
- Boeing, 190–91
- Boltzmann, Ludwig, 34
- book value, of firms, 156, 325n10
- brand belief moats: default choice moat, 204; luxury moat, 202–3; overview, 199–204
- brands: anthropomorphization and, 200–201; death of, 203–4; overview, 200–204; super, 159, 326n12; value, 199, 200
- Brazil, 267–69
- Brooks, Daniel R., 19
- bubbles, 146–47; crashes and, 14; dangers of, 13–14; deflation and, 270–71; Internet, 13, 308–9; price-value relationship and, 13, 13–15, 320n8; real estate (2000s), 5, 270–71. *See also* asset bubbles
- Buffet, Warren, 97, 160, 211, 324n6, 325n8, 326n13
- businesses: hits-based, 301; moated firms compared to fad, 176, 177. *See also* companies; firms; organizations
- business innovation capability categories. *See* innovation capability categories
- capabilities: adaptive economy and, 322n4; allocations and assessment of, 95–97; bifurcations, 128; enabling architectures, 131; knowledge and, 71, 87; multiple, 93–94; species variety and change in, 69; value creation and, 61. *See also* cluster capabilities; dominant design; firms capabilities; innovation capabilities; moat capabilities; organization capabilities

- capabilities, single. *See* hero products
- capability footprints. *See* unique capability footprints
- capital: ethics, 213–16, 327*n*5; inflation and, 274, 275; return on, 95
- capital allocation. *See* allocations
- Carroll, Lewis, 148
- carrying capacity, cluster, 214
- cash, 282, 283, 332*n*31; moats, 295
- Cash Cow, 324*n*1
- cash cow clusters: allocations, 159–61; long-term investments, 160; mature clusters, 160–61; overview, 143, 143, 159–61, 165; See's Candy, 160, 326*n*13; super brands, 159–60
- central banks: debt and, 257–58; Federal Reserve, 247, 249, 257, 283–84, 330*n*6, 331*n*19; money creation and, 292, 293; near and far money management by, 256–57; overview, 256–61, 330*n*7; U.S., 247–48
- CEOs. *See* chief executive officers
- Chaisson, Eric J., 38–39
- Chia pets, 102, 323*n*1
- chief executive officers (CEOs), 325*n*7, 327*n*1; moat management and, 207, 208, 210–12, 215, 216. *See also* management
- choice: default choice moat, 204; moats and customer, 192
- choice set: consumer choice blindness as, 105; defining cluster boundaries by, 103–5, 104; purchase set and, 104
- Clark, Kim, 86
- cluster birth: cluster growth and, 101–25; external, 108, 108, 110–12; internal, 108, 108–11
- cluster boundaries: choice set and defining, 103–5, 104; defining, 103–6
- cluster capabilities, 107, 113, 115, 116–17, 119, 120, 121, 122; cluster convergence to small core, 129–30; cluster development and, 127; key, 182. *See also* dominant design
- cluster convergence: dominant design and, 128, 129, 133, 134, 135–36; mature clusters, cluster death and, 126–40; to small core cluster capability, 129–30; stable clusters and, 158–59; survival and mature clusters, 132–40, 134
- cluster death, 324*n*6; cluster convergence, mature clusters and, 126–40; overview, 138–40
- cluster development: cluster capabilities and, 127; diagrams, 114, 114–15, 324*n*4; empty clusters, 114, 132; overview, 127, 140; rate of change in, 127. *See also* cluster birth; cluster death; cluster growth; early clusters; mature clusters
- cluster growth: cluster birth and, 101–25; Red Queen clusters, 155–56. *See also* growth clusters
- cluster margins: customers, competition and cluster profit margins, 119, 120; ino margin shock and, 122, 123
- clusters: adaptation, 106–8, 116–17; adaptive change of, 137; allocations, 141, 153, 209; carrying capacity, 214; company relationships in, 142; competitive balance and instability, 112–19; customers and, 119, 120, 125; cycles, 102, 109, 116, 118, 119–22, 125, 133, 134, 138; dominant design, 128–32; ecological niches compared to, 101–3, 108–9, 109; efficiency and, 132–33; enabling architectures, 131; feedback loops and, 111, 122; inflation shocks and, 273–75; macroprocessing life cycle of, 102, 109, 119–22; nature of value allocation and, 307–9; network, 191; origins, 106–8; overview, 98, 101–3, 125, 220, 221; quality and moat quality, 175; relative competitive dynamics paradigm, 117, 324*n*5; resilience of, 278, 279; Sector and Index ETFs and, 307–9; selective feedback of, 102. *See also* stable clusters
- cluster spaces: overview, 104, 104; possibility spaces and, 107–11, 109, 125
- cluster value: chains, 111, 112, 273–74; flow, 119, 122–25; moat value and, 175, 175

- Cohen, Jack, 110
- Coke, 67–68, 182, 202, 204, 285, 326n2
- companies: relationships in clusters, 142.
See also firms; organizations
- comparable metrics: of firm capabilities, 106; price-value relationship and fundamental, 7, 12–13
- competition: adaptive economy and, 65; balance and instability, 112–19; declining prices and reduction of, 132, 133; ecology, 105; experience curves and, 82, 84; location and, 112–13, 113; moats, cost, customers and, 188, 189, 190–205; negative optionality and, 85; organizations and, 65, 71, 75, 105–6; selection and, 68; value and, 20–21, 105, 327n1; value flow and, 105
- competitive clusters. *See* clusters
- competitor-altering moats: competitor-limiting moats, 193; government restricted or limited concession moats, 192, 192; network efficiency moats, 193–94; overview, 192–94; patent moats, 192, 192, 193; physical geographic moats, 192, 192–94, 198
- complex adaptive systems. *See* adaptive complex systems
- complexity: adaptive flow, efficiency and, 23–28; predictability of evolutionary systems with growing, 233–34
- complex systems, 317. *See also* adaptive complex systems
- computer: architectures, 131–32. *See also* Internet
- Constructal theory, 37, 68–69, 322n8, 328n2
- consumer-altering moats: behavior moats, 194, 194, 197, 199; behaviors, perceptions and beliefs changes from, 194–204; belief and perception moats, 194, 196–204; overview, 194, 194–95; physiological moats, 194, 195; sunk cost and switching moats, 194–96
- consumers: choice set as consumer choice blindness, 105; consumer behavior moats, 194, 194, 197. *See also* customers
- coordination game, 12
- corruption: in extractive economies, 238–39, 240, 241, 328n5, 331n22; GDP and, 240, 241
- cost: moats, competition, customers and, 188, 189, 190–205; networks and, 191; relationship of price, value and, 188. *See also* price
- crashes: bubbles and, 14; flash, 3–4
- currency: belief and, 246–50, 256, 263, 266, 268, 297; debt and, 250; dollars, 246–48, 330n2; equity and, 250; money and, 246–51, 256, 297; overview, 246–50; U.S., 247–48, 263–64; value and, 248, 250, 256. *See also* money
- customer choice set. *See* choice set
- customers: choice and moats, 192; clusters and, 119, 120, 125; competition, cluster profit margins and, 119, 120; lifetime customer value analysis, 155; moats, cost, competition and, 188, 189, 190–205. *See also* consumers
- cycles: acceleration of adaptive, 137, 138; adaptive economy, 103; clusters, 102, 109, 116, 118, 119–22, 125, 133, 134, 138; evolution, 222, 233, 234, 328n6; knowledge, 233, 234, 328n6; macroprocessing life cycle of clusters, 102, 109, 119–22, 125; survival, 136
