List of Contributors

Jerome Brown, CSW, worked for five years as a family specialist and family specialist supervisor at The Family Center in New York City. In these roles he was involved in the direct delivery and supervision of permanency planning services to families affected by AIDS. He currently works at the New York State AIDS Institute.

Wendy C. Budin received her Ph.D. from New York University in 1996. She is an associate professor in the Graduate Nursing Department at Seton Hall University. She is an expert in maternal child nursing and computer applications in nursing and has published widely in these areas, as well as in nursing research and patient care.

Gloria Caliandro received her Ed.D. in nursing from Columbia University in 1970. She is an expert in community health and is the primary author and editor of Primary Nursing Care (Scott Foresman, 1994). Before her retirement, she was associate dean and associate professor in the College of Nursing at Seton Hall University.

Mathilda Bracers Catarina is associate professor and director of the graduate program in counseling services at William Paterson University of New Jersey. She received her Ph.D. in urban school psychology from Fordham University and completed postgraduate training at the Family Therapy Institute of the State University of New York Health Science Center at Brooklyn. In addition to her research on children with HIV/AIDS, her interests and work include
CONTRIBUTORS

cross-cultural psychology, issues of race and gender, and prevention and re-
duction of violence in our schools and communities.

Rachel Davis received her B.S. and R.N. degrees from Long Beach City Col-
lege. She is a research nurse in the Division of Community Pediatrics of the
University of Texas Health Science Center at San Antonio. She has been the
clinic coordinator for the South Texas Family AIDS Network since 1996, co-
ordinating the medical care for children, youth, and families living with HIV
and AIDS.

Carol E. DeGraw, LCSW, received her MSW from Rutgers University in 1988.
The former executive director of the Coalition on AIDS in Passaic County,
New Jersey, she conducts workshops on HIV, case management, and senior
issues on the local, state, and national levels.

Terence I. Doran, Ph.D., M.D., is associate professor in community pediatrics
at the University of Texas Health Science Center at San Antonio. He has
been the medical director for the South Texas Family AIDS Network since
1991, providing direct medical services for children and their families living
with HIV and AIDS in South Texas. He is principal investigator for La Fron-
tera project, a HRSA funded special project. His published research includes
topics related to HIV as it affects families, children, and migrant seasonal
farm workers in South Texas.

Barbara Draimin, DSW, is the founding executive director of the Family
Center, which serves families throughout New York City by supporting
parents, their children, and future caregivers in the transitions resulting
from serious illness. Before creating this agency in 1993, Draimin was di-
rector of planning at the New York Department of Social Services AIDS
Division and associate to the commissioner of the New York Department
for the Aging.

Jenny Grosz, CSW, a member of the faculty at the Albert Einstein College
of Medicine, has worked in the field of pediatric AIDS since the mid-1980s.
As codirector of the Developmental and Family Services Unit, an interdis-
ciplinary team at the Children’s Evaluation and Rehabilitation Center in
the Bronx, she has developed an array of services for perinatally HIV-in-
fected and -affected children. She has presented at regional, national, and
international conferences and has written several articles and contributed chapters to major works on the psychosocial implications of growing up with HIV infection.

Phyllis Shanley Hansell received her Ed.D. from Columbia University in 1981. She is dean and professor of the College of Nursing at Seton Hall University. Previously she held the position of director of nursing research at Memorial Sloan-Kettering Cancer Center. An NIH-funded researcher, she served as principal investigator on a study that tested an intervention to boost social support in caregivers of children with HIV/AIDS. She is widely published in the area of care of seriously ill children and their families.

Ruth Harrison received her Ph.D. in nursing research and theory development from New York University. She is associate professor of nursing at William Paterson University of New Jersey. Her areas of research include health promotion among HIV-infected persons and spirituality and health.

Bruce Hartman received his Ph.D. in psychology from the Indiana University in 1981. He is professor of professional psychology in the College of Education and Human Services at Seton Hall University. An expert in tests and measurement, he has published widely in the area of research instrument evaluation.

Bert Hayslip Jr. received his Ph.D. in experimental developmental psychology from the University of Akron in 1975. He is regents professor of psychology at the University of North Texas. Dr. Hayslip is a fellow of the American Psychological Association, the Gerontological Society of America, and the Association for Gerontology in Higher Education. He is associate editor of Experimental Aging Research, editor of The International Journal of Aging and Human Development, and coauthor of Hospice Care (Sage, 1992), Psychology and Aging: An Annotated Bibliography (Greenwood Press, 1995), and Grandparents Raising Grandchildren: Theoretical, Empirical, and Clinical Perspectives (Springer Publishing, 2000).

Jan Hudis, MPH, is a co-founder and director of special projects at The Family Center in New York City. She has been involved in the design, implementation, and evaluation of services for families affected by AIDS for more than ten years.
CONTRIBUTORS

Cynthia B. Hughes received her Ed.D. in nursing from Columbia University in 1980. She is a pediatric nurse practitioner and professor of nursing at California State University, Los Angeles. She is widely published in the area of parent/child nursing.

Daphne Joslin received her Ph.D. from New York University and her M.P.H. from Columbia University. Her research and advocacy in the area of HIV/AIDS and older adults began in 1990 while working at the New York City Department of Aging. She is currently associate professor of community health and director of the Institute for Creative Aging at William Paterson University of New Jersey. She has published articles on grandparents raising grandchildren, older adults affected and infected by HIV/AIDS, and employed caregivers. As an advocate, she co-founded the New York Association on HIV Over Fifty, the HIV/AIDS and Aging Committee of the Coalition on AIDS in Passaic County (CAPCO), and the Grandparents as Parents Task Force of Passaic County.

Joan Levine-Perkell, MSW, ACSW, is a clinical social worker and psychotherapist working at the Peninsula Counseling Center in New York. She has served as co-chair of the National Associations for HIV Over 50 and as a member of the New York City AIDS and Aging Task Force.

Nathan L. Linsk is professor at the Jane Addams College of Social Work at the University of Illinois at Chicago. He is the principal investigator for two federally funded education and advocacy centers, the Midwest AIDS Training and Education Center and the Great Lakes Addictions Technology Transfer Center. Linsk is currently principal investigator on a quality assurance and evaluation project assessing Title I Ryan White CARE services for the city of Chicago. His research about older adults, caregiving, case management and HIV includes numerous articles and three books, including Wages for Caring: Compensating Home Care for the Elderly (with S. Keigher, S. England, and L. Simon-Rusinowitz; Greenwood Press, 1992). He is founder and co-chair of the National Association on HIV Over Fifty.

Howard Lune received his Ph.D. in sociology from New York University in 1998. His work explores the organization of collective action, relations between state and civil society, and relations among community-based non-
profit organizations. He is now assistant professor of sociology at William Paterson University.

**Sally Mason** received her Ph.D. from the Jane Addams College of Social Work at the University of Illinois at Chicago. She is currently on the faculty of the Institute for Juvenile Research, Department of Psychiatry, University of Illinois. Her research and scholarly work focuses on families affected by HIV, specifically permanency planning with HIV-infected parents and relative caregivers of HIV-affected children.

**Lockhart McKelvy**, MSW, is clinical support supervisor for the Family Center in New York City. He served as coordinator of the Children in AIDS Families Project at Beth Israel Medical Center. He has written several journal articles and book chapters on HIV/AIDS and its effect on families.

**Carol Mevi-Triano** earned her Ed.D. from Rutgers University. She is the assistant director of community medicine at a large urban New Jersey medical center. In this capacity she oversees all outpatient HIV programs for children, adolescents, adults, and their families.

**Namposya Nampanya-Serpell** received her Ph.D. in policy sciences from the University of Maryland in 1998. Her professional experience includes work as an economist in the Zambian government and as a UNICEF program officer. She has also worked as a technical advisor to many organizations, including Save the Children Federation, UNAIDS, Family Health International, and Project Support International.

**Elizabeth C. Paskas**, R.N., received her bachelor of science from William Paterson University. She worked as a treatment care manager in Passaic County, New Jersey, where she developed programs to assist people with HIV to adhere to their treatment regimens. She now works at the Hackensack University Medical Center. She continues her efforts to educate the community on the issues surrounding people with HIV and their families.

**Cynthia Cannon Poindexter**, MSW, Ph.D., is an assistant professor at the Boston University Graduate School of Social Work. She was one of the first
CONTRIBUTORS

ten national John A. Hartford Geriatric Social Work Scholars, receiving a grant to study HIV-affected older caregivers.

Phyllis Russo received her Ed.D. in administration in higher education in 1996 from Seton Hall University, where she is an associate professor in the Undergraduate Nursing Department. She is a coauthor of Oncology Nursing: Pathophysiology and Assessment (Macmillan, 1997).
