INDEX

Abstract conceptualization stage of learning, 17–18
Acceptance in relationship building, 70–75, 111, 265
Action stage of change, 199–202
Active experimentation stage of learning, 18
Active listening techniques, 145, 241–46, 249
Advice and suggestions in interviewing, 263–64
Affective empathy, 88
Agency thinking, 200
Ahn, H., 96
Ainsworth, M. D. S., 91
Alliance, therapeutic, see Therapeutic alliance
Ambivalence in clients, 42, 126–27, 208–9
Arbitrary inference, 186–87
Artistic aspects of social practice, 11, 55, 68
Assessment phase: cognitive factors in, 53, 164; collaborative atmosphere development, 158–59, 239; cultural diversity issues, 165; data analysis, 165, 168–71; data gathering, 160–65, 166–68; goal setting in, 159
Attachment theory, 26, 90–94, 271
Attending techniques, 145, 241–46, 249
Audio/video taping of interviews, 230–31, 242, 245–46, 279, 281
Awareness-in-action, 22–23; see also Self-awareness in practitioner
Bachelor, A., 88
Beck, A., 186
Beginning stages of helping process: data analysis, 165, 168–71; data gathering, 160–65; initial stage, 151–59, 171–75; preparatory stage, 143–50
Belief in helping process, 132–33
Belief systems/schemas, 85, 187–88, 268–69
Berg, I. K., 196–97
Bess, J. M., 27
Biological factors in assessment phase, 164
Blocking behaviors, 280, 281–82
Body language, 242, 244–46, 264
Bogo, M., 14, 20, 21, 38, 58, 80, 85, 157, 163, 230, 278, 281
Bohart, A. C., 197
Bonding, emotional: through acceptance, 73; in attachment theory, 91; in case management, 210; through empathy, 82–83; with involuntary clients, 97–98, 111–12; and long-term maintenance, 107–9, 110, 203–6; overview, 97–99; processing at ending phase, 221–25; through self-disclosure, 102–5; see also Therapeutic alliance
Borash, M., 112
Bordin, E., 97
Boundary issues, ethical, 106, 114–15, 117
Bowlby, J., 25–26, 90–91
Brainstorming, 200
Brown, L. S., 106

Capacity building: in change process, 128; through feedback, 220, 274; overview, 52–53; in strengths perspective, 137; by theme identification, 189
Carkhuff, R., 79
Case management model, 209–12
Challenge as intervention tool, 76, 198, 274–78
Change process: action stage, 199–202; case management model, 209–12; dynamics/focus of, 118–20, 127; expanded understanding, 183–84; in-depth exploration, 184–92; maintenance of working relationship, 203–6; models for, 120–22, 180–83; monitoring goal achievement, 206–9; new perspective development, 197–99; research in, 122–23, 124; social worker as process expert, 176–77; stages of change, 124–30; strengths perspective, 51–52, 130–31, 134–37, 192–97, 271; support, providing and fostering, 177–80, 255–57; see also Helping process
Clarification skills in interviewing, 238–41
Clark, J. L., 83, 156
Client-centered approach, 47–48, 55–56, 65–66
Clients: expectations of, 40, 93–94, 174–75, 259–60; willingness of, 194, 208–9; see also Relationship building
Close-ended questions, 235–37

Cognitive factors: in assessment, 53, 164; and empathy, 88; in in-depth exploration, 268–69; in intervention phase, 186–89
Collaboration, commitment to, 99–101
Common factors approach, 96–97, 130–34
Competence, professional, 10, 18, 45, 251, 281
Concrete experience stage of learning, 17
Concreteness, seeking through questioning, 238–41, 267
Confrontation as intervention tool, 76, 198, 274–78
Congruence in relationship building, 79–81
Consciousness-raising, 52, 192
Contemplation stage of change, 126–27
Context of practice: core concepts/practices, 50–54; introduction, 3–4, 5; knowledge base, 4–6, 10–15; learning processes, 15–19; linkage phase, 48–50; organizational, 8–9; professional response phase, 54–60; self-awareness/reflection, 20–33; and social worker, 6–8
Coping styles, 53–54, 130, 160–61, 193; see also Strengths perspective
Cotransference, 25
Countertransference, 24–26, 40–41, 103, 245
Critical theory vs. reflective process, 48
Crits-Christopher, P., 273
Cross-cultural counseling, 38, 47, 86–87; see also Cultural diversity issues
Crossing of boundaries, ethical, 106, 115
Cultural diversity issues: in assessment phase, 165; awareness of in practice, 146, 156–58; and emotional display,
251–52, 266; and empathy, 84–87; and ending phase of helping process, 216–17; and immigration, 38–40, 64–65, 87, 157–58; internalized culture, 37, 41–44; and interviewing, 243–46, 269; overview and contemporary practice profile, 35–41, 64–65; and self-disclosure, 104–5; see also Diversity; Ethnicity; Power/privilege/oppression dynamic
Cultural learner approach, 38–40, 85–87, 156
Cultural literacy approach, 36–37, 85–86
Culture, definition, 35

Data gathering and analysis for assessment, 160–65, 166–71
Davis, L. E., 70
DeJong, P., 196–97
“Demand for work” approach, 209
Developmental issues, themes for, 190–91
Dillon, C., 80, 82, 106, 114, 176, 225, 272
Direct questioning, 233
Disorganized/disoriented attachment style, 91–92
Distractions, minimizing, 145–46
Diversity: and common factors approach, 134; and empathy, 84–87; individual, 13, 37, 51; integrating perspective in practice, 156–58; and internalized culture, 37, 41–44; and self-disclosure, 104; see also Cultural diversity issues; Power/privilege/oppression dynamic
Duncan, B. L., 96, 126, 133, 174
Dyche, L., 38, 85, 156

Early relational experiences, 26, 190–91
Echoing questions, 234
Ecological-systemic perspective, 20, 119, 160–63, 210, 219

Ecomaps, 162, 242
Economic issues, 9, 52–53, 129
Edwards, J. K., 27
Elliott, R., 82
Emotions/feelings: in assessment phase, 53; and cultural diversity issues, 251–52, 266; interview stage access to, 233, 265–68; primary/secondary emotions, 185–86, 250–51, 270; and reflection techniques in interviewing, 249–52; and self-care of practitioner, 30; see also Bonding, emotional
Empathy: in challenges, 275; and diversity, 84–87; importance in therapeutic process, 25; interactivity of, 87–90; with involuntary clients, 112; overview, 81–84; preparatory, 149–50; and self-disclosure, 103
Empirical support of principles, 10–12, 56–58, 68, 122–23, 169–70, 180–82
Empowerment, see Capacity building
Ending phase of helping process, 213–25
England, H., 13
Environmental factors, see Societal environment
Environmental reevaluation, 192
Ethical considerations: boundaries, 106, 114–15, 117; ending phase relationships, 222–24; in ongoing client/practitioner relationship, 113–15, 117; practice principles, 3–4, 66; in self-disclosure, 102, 106–7
Ethnicity, 35, 41–44, 70; see also Diversity; Power/privilege/oppression dynamic; Societal environment
Evaluation of progress, 56–58, 206–9, 217–19; see also Feedback, client
Evidence-based practice approach, 10–12
Evocative responding, 267
expanded understanding, 183–84
expectations of client, 40, 93–94, 174–75, 259–60
expert knowledge, limitations of, 12, 16
external vs. internal dynamics, 192, 211, 240
extratherapeutic common factors, 96, 130–31

Family/couple vs. individual interventions, 170, 174, 177–78
Family dynamics, 37, 162, 194–95
Feedback, client: and capacity building, 220, 274; to challenges, 278; in change process, 136; eliciting and responding to, 247–48, 253–55; in ending phase, 217–18; evaluation instruments, 100–1; in interviewing, 246–48; and perception of empathy, 86, 88–89; and relationship maintenance, 107–9, 203–6; and style of intervention, 174
Feedback, practitioner, 155, 259–63
Feedback, professionals/peers, 31, 246–47, 281
Feelings/emotions, see Emotions/feelings
Feminism, influence on practice techniques, 36, 39, 50, 103
Field instruction/education, 7, 15, 20
Focus of change, 118–20, 127
Fortune, A. E., 123, 210
Foster, R. P., 42
Frank, J., 133
Funding issues, 9, 52–53, 129
Fusko, L., 189

Gains, consolidation of, 218–19
Gambrill, E., 11, 170
“Generative thinking,” 197–98
Genograms, 162, 242
Genuineness in relationship building, 78–81
George, U., 46, 85, 230
Germain, C. B., 160–61
Gibbons, M. B.C., 273
Gibbs, L., 11, 170
Gift-giving issues, 117
Goal-oriented approach, 64
Goal setting: and assessment phase, 159; collaborative, 127, 171–75; in interview phase, 258–59; with involuntary clients, 112–13; monitoring achievement, 206–9; overview, 97, 98; in preparation stage of change, 127
Goldstein, E. G., 169, 193
Goldstein, H., 68
“Goodness of fit” concept, 51, 63, 172
Goolishian, H., 86
Green, J. W., 86
Green, R. J., 45
Greenberg, L., 82, 185–86, 270
Grencavage, L. M., 96
Group vs. individual interventions, 12, 110–12, 123
Guesses and hunches, 272–73

Hartman, A., 162
Healing context, 133
Helping process: belief in, 132–33; data analysis stage, 165, 168–71; data gathering stage, 160–65, 166–68; ending/termination phase, 213–25; hope and, 132–33, 199–200; initial stage, 151–59, 171–75; preparatory stage, 143–51; for prolonged capacity building, 52–53; stages overview, 137–40; see also Change process; Relationship building
Helping Relationship Inventory (HRI), 100–1
Helping relationships, see Relationship building; Therapeutic alliance
Hill, C. E., 275
Ho, D., 37
Holding environment, 73–74, 266
Hope in helping process, 132–33, 199–200
Horvath, A. O., 87–88, 107
Hubble, M. A., 96, 126, 133, 174
Humanistic approaches, 68, 78, 81–82, 103
Hunches and guesses, 272–73
Immigration and cultural issues, 38–40, 64–65, 87, 157–58
In-depth exploration in interviewing, 265–69, 281
Indirect phrase questioning, 234
Individual change, 119
Individual diversity, 13, 37, 51
Individual dynamics and themes, 189–90
Individual vs. family/couple interventions, 170, 174, 177–78
Individual vs. group interventions, 12, 110–12, 123
Information: examination of records, 148–49, 163; gathering of, 154–56, 211–12; sharing of in interviews, 259–63
Initial stage of helping process, 151–59, 171–75
Insecure-ambivalent attachment style, 91–92
Insecure-avoidant attachment style, 91–92
Integrated approach, 3, 8, 55–56, 229–31
Integration of theory and practice, 13, 20–33, 48–60, 163
Intention and purpose, 64
Internalized culture, 37, 41–44
Internal vs. external dynamics, 192, 211, 240
Internal working models, 91–94
Interpersonal relationship factors, 51, 94, 162, 165, 189
Interpretation needs, language, 146–47
Interpretations in interview phase, 272–74
Interruptions, minimizing, 145–46
Intersubjectivity theory, 25
Interventions: as action stage of change, 199–202; definition, 177; empirical support in, 180–82; family/couple vs. individual, 170, 174, 177–78; group vs. individual, 12, 110–12, 123; with involuntary clients, 109–11; types of, 123, 179; see also Change process
Interviewing skills: attending and active listening, 241–46; challenge techniques, 274–78; continuing professional development, 279, 281; evaluation of interviews, 278–79; goal setting, 258–59; importance of, 3–4; in-depth exploration, 265–69, 281; information providing, 259–63; and integrated approach, 8, 229–31; interpretations and explanations, 272–74; reframing techniques, 269–71; responding techniques, 246–55; suggestion providing, 263–64; support and validation, 255–57; using questioning techniques, 232–41; see also Relationship building
Intuition, 13–14
Involuntary clients, relationship building with, 97–98, 109–13, 194
ITP loop model, 20–33, 48–58, 54–60, 168
Ivanoff, A., 111

INDEX
Joining, 151–52

Keenan, E. K., 48
Kenyon, G. L., 14
Knei-Paz, C., 78

Knowledge base: building and augmenting, 14–15, 181; models/theories in, 5–6, 49–50; overview, 4–6; using in practice, 10–14

Kohut, H., 25, 82
Kolb, D. A., 17–18

Laird, J., 86
Lambert, M. J., 96, 131, 135

Language skills, 281

Learning processes for social workers, 15–19, 279, 281

Linguistic issues for clients, 146–47

Linkage phase (in ITP loop model), 49, 59–60, 138–39

Listening techniques, 145, 241–46, 249

Long-term maintenance of relationship, 107–9, 110, 203–6

McMahon, M. O. N., 39–40, 47

Macro level issues in environment, 21, 51, 161–62

Magnification cognitive style, 187

Main, M., 92

Maintenance of relationship, 107–9, 110, 203–6

Maintenance stage of change, 128

Managed care issues, 9, 52–53, 181, 245

Martinez-Brawley, E. E., 68

Metaphors as elicitation tools, 267

Mezzo level issues in environment, 21, 161

Micro level issues in environment, 161

Middle stages of helping process, see Change process

Miller, S. D., 96, 126, 133, 174

Minimization cognitive style, 187

Mishna, F., 34, 115, 117, 223–24

Models/theories: attachment theory, 26, 90–94, 271; case management, 209–12; for change processes, 120–22, 124, 180–83; common factors approach, 96–97, 130–34; cultural learner approach, 38–40, 85–87, 156; cultural literacy approach, 36–37, 85–86; “family doctor,” 157, 221; humanistic approaches, 68, 78, 81–82, 103; intersubjectivity theory, 25; as knowledge base element, 5–6, 49–50; multiperspective assessment, 163–65; in professional response phase, 55; psychosocial, 10–12; relationship, 78–90, 91–94; for therapeutic alliance, 95–97

Monitoring of progress, 56–58, 206–9, 217–19; see also Feedback, client

Multicultural perspective, 23–24, 156–58; see also Cultural diversity issues

Multiperspective assessment, 163–65

Multiple-choice questions, 237

Muran, J. C., 205–6

Murphy, B.C., 80, 82, 106, 114, 176, 225, 272

Nakanishi, M., 43–44

National Association of Social Workers (NASW), 115

Nonjudgmental attitude, 70–75, 111, 265

Nonverbal behaviors, 244–46, 264

Norcross, J. C., 96

Normalization, 262–63, 267–68

Nurturant empathy, 88

O’Brien, K. M., 275

Obstacles and strengths, identifying, 192–97; see also Strengths perspective
Okun, B., 242
Open-ended questions, 232–35, 266–67
Oppression, see Power/privilege/oppression dynamic
Orange, D. M., 25
Organizational structure/mandates: and assessment formats, 165; client turnover pressure, 80; influence on ending phase, 213–14, 215; and limitations to practice, 52–53, 98, 129, 181; and practitioner well-being, 30; in social practice context, 8–9, 155; as threatening to clients, 132; validation of service scope, 260–61
Overgeneralization cognitive style, 187
Pacing, see Timing
Paraphrasing as response technique, 247–49
Parroting vs. paraphrasing, 248
Partnership, commitment to, 99–101
Pathways thinking, 200
Patterns, identifying, 189–92
Personalization, 187
Personal self, 3, 6–7, 73
Person-in-context, 20, 29–32; see also Self-awareness in practitioner
Perspective development, 197–99
Physical/psychological setting for practice, 144–48, 244–46
Physical well-being of practitioner, 32
Pinderhughes, E., 73
Planning: in action stage, 202; and goal setting, 127, 171–75; post-termination phase, 220–21; see also Assessment phase
Polarizing cognitive style, 187
Positive regard, 70–75, 111, 265
Positivist paradigm, 10, 12
Poulin, J., 100–1
Power, definition, 45
Power/privilege/oppression dynamic: and acceptance, 72; and client expectations, 175; in client/practitioner relationship, 52, 158, 222; in close-ended questioning, 235–36; and cultural diversity issues, 39–42; and involuntary clients, 111–13; overview, 23–24, 44–48; and self-disclosure, 104–5
Practice environment, preparing, 144–48
Practice principles: blocking behaviors, 280, 281–82; case management, 210–12; for change guidance, 120, 129; definition, 6; and ethics, 3–4, 66; internal working model development, 93–94; for relationship building, 116; “space and place” concept, 63–64, 126–27, 176, 203; “start where the client is” approach, 98, 154, 193
Precontemplation stage of change, 125–26
Preparation stage of change, 127
Preparatory empathy, 149–50
Preparatory stage of helping process, 143–51
Primary emotions, 185–86, 250, 270
Primary relationships of practitioner, 31–32
Principles of practice, see Practice principles
Privacy in practice environment, 144–45
Procedures and common practice approach, 133–34
Process, 22, 63–64, 138; see also Interventions
Processing styles, 186–87
Process-outcome research, 182, 192
Prochaska, J. M., 127, 129
Prochaska, J. O., 124, 125, 126, 127, 128–29
Proctor, E. K., 11, 70
Professional comportment, importance of, 4; see also Ethical considerations
Professional development, continuing, 46–48, 279, 281
Professional response phase (in ITP loop model), 49, 55–60
Professional self, 6, 22
Professional vs. non-professional helpers, 65–66
Progress, evaluation of, 56–58, 206–9, 217–19; see also Feedback, client
Prompting through questions, 232
Psychoanalytic/psychotherapeutic methods, 24–25, 50, 82, 95–97, 103, 120–21, 191
Psychodynamic factors in assessment, 164
Psychodynamic theory, 23, 24, 50
Psychoeducation, 261
Psychosocial theory, 10–12
Questioning techniques in interviewing, 232–41
Race, see Ethnicity; Power/privilege/oppression dynamic
Racker, H., 24
Reamer, F. G., 107, 114–15
Recording interviews, 230–31, 242, 245–46, 281
Referral, establishing nature of, 153
Reflection-in-action, 13–14
Reflection phase (in ITP loop model), 21–22, 58–59; see also Reflective process
Reflection techniques in interviewing, 249–52, 260, 265, 281
Reflective observation stage of learning, 17
Reflective process: and critical theory, 48; and evaluation, 56–58; and genuineness, 79; and internalized culture, 41–44; and learning, 16–17; see also Self-awareness in practitioner
Reframing techniques in interviewing, 269–71
Reid, W. J., 123, 210
Relabeling techniques, 269–71
Relational change, 119
Relational theory, 25–26
Relationship building: acceptance, 70–75, 111, 265; attachment theory, 26, 90–94, 271; behaviors overview, 67–69, 75–77; collaborative models for, 54; context overview, 62–65; empirical support for importance of, 95–101, 131; forming helping relationships, 24–25, 33; genuineness, 78–81; in initial stage of helping process, 153–54; with involuntary clients, 97–98, 109–12, 104; and long-term maintenance, 107–9, 110, 203–6; professionals’ key components, 65–67; warmth and caring concern, 69, 75–77; see also Empathy; Therapeutic alliance
Research on social work practice: on change process, 122–23, 124; dearth of, 8; ethnographic study of therapy, 64; limitations of, 10–11; as practice tool, 57; process-outcome, 182–83, 192; see also Models/theories
Resources for help: access to, 45, 171, 211, 255–56; planning for post-termination phase, 220–21; psychoeducation, 261–62
Respect, 70
Responding techniques in interviewing, 246–55, 267
Restatement as response technique, 247–49
Retrieval phase (in ITP loop model), 20–21, 58–59
Reviewing progress at ending phase, 217–19
