Social work has a unique history, purpose, perspective, and method. The primary purpose of this series is to articulate these distinct qualities and to define and explore the ideas, concepts, and skills that together constitute social work’s intellectual foundations and boundaries and its emerging issues and concerns.

To accomplish this goal, the series will publish a cohesive collection of books that address both the core knowledge of the profession and its newly emerging topics. The core is defined by the evolving consensus, as primarily reflected in the Council of Social Work Education’s Curriculum Policy Statement, concerning what courses accredited social work education programs must include in their curricula. The series will be characterized by an emphasis on the widely embraced ecological perspective; attention to issues concerning direct and indirect practice; and emphasis on cultural diversity and multiculturalism, social justice, oppression, populations at risk, and social work values and ethics. The series will have a dual focus on practice traditions and emerging issues and concepts.
