# INDEX

---

- abortion, 16–17  
 addiction: dual nature of, 27; in eating disorders, 1–2, 11, 153; fluid nature of, 151; self-concept and body image in, 153  
 adolescence, 153  
 Adonis complex, 14  
*The Adonis Complex* (Pope, Phillips, and Olivardi), 14, 20  
 age, Claudia Bernard lies about, 88, 93  
 Alexander, Jane, 161  
 Allen (Heather) case study, *see* Heather Allen case study  
 anger, of Linda Miller, 146–47  
 animal drawings, *see* House/Tree/Person/Person (Opposite Sex)/Animal (HTPPA) drawings  
 anorexia nervosa: addiction in, 2, 147, 153; among college students, 8; among nuns, 7–8; body image in, 1, 12–13; definition of, 7; diagnostic classification of, 7; diet effectiveness in, 9–10; Heather Allen case study, 106–26; history of, 7–8; Linda Miller case study, 126–49; self-nurturing ability in, 11; treatment of, 8  
 appetite, 2  
 archetypes, 19–20  
 art: ethical society and, 161–63; as index to psychological health, 4–5; search for form in, 4–5; social function of, 160–61  
 art therapy: acceptance as legitimate discipline, xiii, 23, 160–61; art of, 163; basis for, 22–23; dream work in, 24–25; dynamics of, 6; establishing freedom in, 28; gender bias in, 151–52; interpretation in, 25; multi-dimensional nature of, xiii; progress prediction in, 26; as scientific evidence, 149; scope of, 213–14; socialization and, xii; suicidal images in, 207–8; therapeutic effectiveness of, 26, 156, 158–59; therapy of, 22–26; unconscious and, 6, 24–26; verbalization in, xi–xiii, 23–24  
 BCD, *see* body contour drawings (BCD)  
 BDEM, *see* body dimension estimate and measurements (BDEM)  
 beauty, 6–7  
 Bell, C., 4–5  
 Bell, R., 7  
 Bellafonte, Ginia, 15  
 Bernard (Claudia) case study, *see* Claudia Bernard case study  
 biological clock: Claudia Bernard and, 93, 96; Linda Miller and, 141  
 body contour drawings (BCD), 40–42; Claudia Bernard case study, 101, 102f; Heather Allen case study, 121–22, 122f; Jessica Mason case study, 83–84, 84f; Linda Miller case study, 141–45, 142f; Megan Brown case study, 61–64, 62f; questionnaire, 41, 200–1; subjects' reaction to, 143–44; therapeutic use of, 158  
 body dimension estimate and measurements (BDEM), 30–31; circumference, female, 193–94; circumference, male, 189–90; Claudia Bernard case study, 93; figure selection chart, 216; frame size estimate chart, 210; Heather Allen case study, 112; inaccurate perception of, 144; Jessica Mason case study, 74–75; Linda Miller case study, 133; linear, female, 191–92; linear, male, 187–88; Megan Brown case study, 51; Metropolitan Life Insurance height and weight tables, 209  
 body dysmorphic disorder, 14

- body image: American ideal of, 6–10;  
body dimension estimates vs. actual  
measurements, 30–31; definition of,  
2; distortion of, 12–14, 152; genetic  
templates and, 6; in males, 14–15;  
nonphenomenal, defined, 3; PNBIT  
in development of, 156, 158; self and,  
11–21; self-concept and, 13–14, 153;  
significance of, 1–10; thinness as  
ideal, 6–7; yo-yo syndrome in, 17
- brain function, 22
- Brown (Megan) case study, *see* Megan  
Brown case study
- Bruch, H., 9
- bulimia, 154
- caloric restriction, 11

- case studies, *see* clinical applications
- Catherine de Siena (saint), 8
- Chesler, P., 17
- Chromatic Family Line Drawing  
(CFLD), 32–33; Claudia Bernard case  
study, 94; Heather Allen case study,  
112–14, 113f; Jessica Mason case study,  
75, 76f; Linda Miller case study, 133;  
Megan Brown case study, 52
- Cirlot, J. E., 78, 140
- Claudia Bernard case study, 44–67;  
biological clock in, 93, 96; body  
contour drawings, 101, 102f; body  
dimension estimates and measure-  
ments, 93; chromatic family line  
drawings, 94; discussion of, 103, 105;  
eating questionnaire, 104; exit tape  
recording extract, 168–69; family  
history, 91; HTPPA drawings, 94–96;  
kinetic family clay sculpture, 100–1;  
lies about age, 88, 93; mandalas,  
96–99, 97f, 98f, 99f; medical history,  
90–91; mirror viewing, face, 92;  
mirror viewing, full-length, 92–93;  
nonphenomenal tasks, 94–101; per-  
sonal history, 90; phenomenal tasks,  
92–93; project compliance, 91–92;  
Sandworlds, 100; Self Box, 99–100;  
self report, 102–3; summary, 105–6;  
Tennessee Self Concept Scale data  
analysis, 87–88, 89f, 90; weight  
history, 90; weight recording, 92
- clinical applications, 43–150; Claudia  
Bernard case study, 44–67; Heather  
Allen case study, 106–26; Jessica  
Mason case study, 68–87; Linda  
Miller case study, 126–49; Megan  
Brown case study, 44–67
- clothing industry: acknowledgment of  
large-sized customers, 10; September  
11 disaster impact on, 14–15; thinness  
ideal and, 7
- colleges, eating disorder prevention in,  
155–56
- college students, eating disorders in,  
154
- color chart form, 31, 217
- combined phenomenal and non-  
phenomenal task: body contour  
drawing, 3, 40–42; Claudia Bernard  
case study, 101, 102f; Heather Allen  
case study, 121–22, 122f; Jessica  
Mason case study, 83–84, 84f; Linda  
Miller case study, 141–43, 142f; Megan  
Brown case study, 61–64, 62f
- corpus callosum, 22
- creativity, brain function in, 22
- cultural elitism, 161
- Diagnostic and Statistical Manual of  
Mental Disorders* (DSM-III), 7
- Doolittle, John T., 161
- drawing techniques, projective, 37
- dreams, 24–25
- Dynamically Oriented Art Therapy: Its  
Principles and Practice* (Naumburg),  
xii
- eating disorders: addiction in, 1–2;  
body image in, 12–14; caloric re-  
striction in, 11; in college students,  
154; female bias in research on,  
151–52; in males, 14, 20; relationship  
of issues in, 215; school prevention  
programs, 155–56; yo-yo syndrome  
in, 9
- eating questionnaire, 196–200; Claudia  
Bernard case study, 104; Heather  
Allen case study, 124t; Jessica Mason  
case study, 85, 85t; Linda Miller case  
study, 146t; Megan Brown case study,  
65t–66t
- elitism, cultural, 161

- endogenous opioids, in appetite regulation, 2
- estimates, *see* body dimension estimate and measurements
- Estrich, S., 17
- ethical society, art and, 161–63
- exercise, 14
- family role, in eating disorders, 152, 153–54
- fashion industry, *see* clothing industry
- fat advocacy groups, 10
- feeding of infants, 11
- females: circumference, body dimension estimate and measurements, 193–94; gender bias in eating disorder research, 151–52; linear, body dimension estimate and measurements, 191–92; outline drawings, figure selection, 186; weight ranges in, 18f
- feminazi, 17
- The Feminine Mystique* (Friedan), 15, 17
- feminism: backlash against, 16–17; gender relations in, 16; growth of, 15–17
- food: addiction to, 2; as reward, 129
- form: concept of, 4–5; meaningful, as psychotherapeutic goal, 4
- frame size estimate chart, 210
- Freud, Sigmund, 19, 24
- Friedan, Betty, 15–16, 17–19, 20
- Gantt, L., 26
- gender roles: female bias in eating disorder research, 151–52; feminism and, 16, 18–19, 20
- Goldfarb, W., 13
- Gombrich, E. H., 13, 143
- Hackney, Sheldon, 161
- Hammer, E., 34
- Hatterer, L. J., 1–2, 12
- health, definition of, 4
- Heather Allen case study, 106–26; body contour drawings, 121–22, 122f; body dimension estimates and measurements, 112; chromatic family line drawing, 112–14, 113f; discussion of, 123, 125; eating questionnaire, 124t; exit tape recording extract, 168–72; family history, 110; HTPPA drawings, 114–17, 116f; kinetic family clay sculpture, 120; mandalas, 117–18, 119f; medical history, 110; mirror viewing, face, 112; mirror viewing, full-length, 112; nonphenomenal tasks, 112–20; personal history, 108; phenomenal tasks, 111–12; project compliance, 110–11; Sandworlds, 120; Self Box, 118, 120; self report, 122–23; summary, 125–26; Tennessee Self Concept Scale data analysis, 106, 107f, 108; weight history, 108–9; weight recording, 111–12
- height and weight tables, 209
- heroes, of September 11 disaster, 15
- Hinsie, L. E., 129, 139
- Holy Anorexia* (Bell), 7
- House/Tree/Person/Person (Opposite Sex)/Animal (HTPPA) drawings, 33–37; Claudia Bernard case study, 94–96; Heather Allen case study, 114–17, 116f; Jessica Mason case study, 72, 73f, 75, 77–79, 77f, 80f; Linda Miller case study, 133–35; Megan Brown case study, 52–53, 54f, 55–56, 55f
- illusion, mirror image as, 143–44
- infant feeding and nurture, 11
- Jenny Craig weight loss program, 8
- Jessica Mason case study, 68–87; body contour drawings, 83–84, 84f; body dimension estimates and measurements, 74–75; chromatic family line drawing, 75, 76f; discussion of, 85–86; eating questionnaire, 85, 85t; exit tape recording extract, 165–68; family history, 70–71; HTPPA drawings, 72, 73f, 75, 77–79, 77f, 80f; kinetic family clay sculpture, 81–83; mandalas, 79; medical history, 70; mirror viewing, face, 72–73; mirror viewing, full-length, 73–74; nonphenomenal tasks, 75–83; personal history, 70; phenomenal tasks, 71–75; project compliance, 71; Sandworlds, 81; Self Box, 81, 82f; self report, 84–85; strabismus in, 72; summary, 86–87; Tennessee Self Concept Scale data analysis, 68, 69, 69f; weight history, 70; weight recording, 71–72
- Jung, C. G., 19–20, 163

- Kalff, D., 39
