**PART I: Uncertainty**

1. Forecasting in Extreme Environments 3
2. Thinking in Probabilities 32
3. The Balance Between Overconfidence and Underconfidence, and the Special Risk of Complex Modeling 55

**PART II: Information**

4. Fighting Information Overload with Strategy 87
5. Making Decisions in Real Time: How to React to New Information Without Falling Victim to Cognitive Dissonance 110
6. Mitigating Information Asymmetry 137

**PART III: Analysis and Judgment**

7. Mapping from Simple Ideas to Complex Analysis 157
8. The Power and Pitfalls of Monte Carlo Modeling 178
9. Judgment 206
